

# M155 Messenger

The M155 Messenger is a sophisticated wireless messaging device for use in professional healthcare and hospitality environments. The small watch-like device is easy to wear and provides the mobile user the optimum in mobility, accessibility, flexibility and comfort. Besides a messaging device, the M155 also offers the mobile user speakerphone communication and acts as a personal alarm device.

## At a glance

- Appealing design, easy to use
- Increased accessibility
- Flexibility, comfort and mobility
- Messaging and voice communications in one
- Personal alarm function
- Reduced communication and maintenance cost
- A simple, small and secure solution

The M155 Messenger brings mobile messaging and speakerphone communication for DECT users to the highest level of comfort, with:

- An appealing design
- Three-line display
- Easy to carry (on wrist or as necklace)
- Easy to use
- Gives users full control over their accessibility
- Provides various call control options and integrates seamlessly with the PBX and (messaging) applications
- Complies with DECT standards for high quality speech and security (DECT authentication)
- Provides an excellent communications device for organisations that rely on messaging or alarm information sent to employees, such as in hospitals and hotel environments
- Is easy to service and maintain

Integrated with applications common in healthcare and hospitality, the M155 Messenger meets the needs of message communications in environments where conveying messages to the mobile user is of utmost importance.

The M155 Messenger can furthermore be used for voice communication and serves as a personal alarm device.
