Website Hosting Made Easy

The Hosting Net Website Hosting solutions are designed to meet a wide variety of end-user Internet Service and Hosting requirements:

- **Mail Only** — The Mail Only plan provides an email account using the domain "hostingnet.net.au".
- **DNS** — This plan provides the owner with the ability to register and manage a DNS domain hosted by Hosting Net.
- **Standard** — This plan is suitable for entry level websites with limited storage requirements and static content such as product and service descriptions.
- **Enhanced** — This plan is suitable for websites that require some increase in functionality. It offers increased storage and traffic quotas, as well as scripting and database support.
- **Premium** — This plan is suitable for a sophisticated website with more complex scripting and database requirements. It offers generous storage and traffic quotas.

Sophisticated hosting environment

NEC's Hosting Net Solutions are:

- Supported by a sophisticated multi-platform control panel solution designed to simplify management and administration of websites and email systems
- Delivered using fully redundant server clusters to ensure maximum availability and scalability
- Protected by best-in-class Intrusion Detection, Anti-Spam and Anti-Virus control systems.

Sophisticated hosting environment

The Hosting Net Solution allows management flexibility through a control panel that provides multi-level access, including:

- **Domain Owner Level:** This is the individual domain owner account with predetermined permission sets and interface for single domain administration. The domain owner is able to self-manage most of the tasks associated with their domain, including DNS, Website, and Mail accounts.
- **Mail User Level:** The mail account owner is able to log in to their own individual interface and perform tasks such as managing passwords, spam filter settings and anti-virus settings.
