

“NeoFace, NEC’s face recognition technology records the highest face matching accuracy in the industry and captures images at various angles even if the target’s face is partly concealed or the person is on the move. Moreover, the software-driven NeoFace Watch enables video surveillance of suspects in crowded areas at unmatched speed and throughput in real time. Due to its focus on developing innovative solutions comprising a wide range of biometric technologies, NEC has emerged as a leader in the Asia-Pacific biometrics market with dominance in both public and private sector deployments.”

## NEC CORPORATION 2019 ASIA-PACIFIC BIOMETRICS COMPANY OF THE YEAR

Frost & Sullivan recognizes NEC for its superior biometrics technology, innovative solutions, and high customer value and satisfaction in public and commercial applications. Amid stiff competition in Asia-Pacific, where the demand for biometric solutions is increasing rapidly in both public and commercial sector projects, NEC has successfully established itself as a pioneer in the biometrics market. NEC’s undisputed excellence in designing and manufacturing different biometric modalities, namely for fingerprint, finger vein, facial, iris, voice, palm print, and ear acoustic, shows its commitment to enhancing the quality of life by making smart cities safer and commercial businesses more secure. The 2019 Frost & Sullivan Asia-Pacific Company of the Year Award in the Biometrics Industry acknowledges NEC’s product and service offerings and celebrates its success in the region.
