

Harmony SASE by NEC

Secure access without compromise, wherever your business works.

The Challenge: Securing the Distributed Workforce

- Hybrid work models demand secure access from anywhere, on any device.
- Legacy VPNs create bottlenecks, high latency, and management headaches.
- Siloed network and security tools increase complexity and blind spots.
- SaaS sprawl and shadow IT expose sensitive data to risk.

The result? Frustrated users, escalating costs, and growing cyber risk.

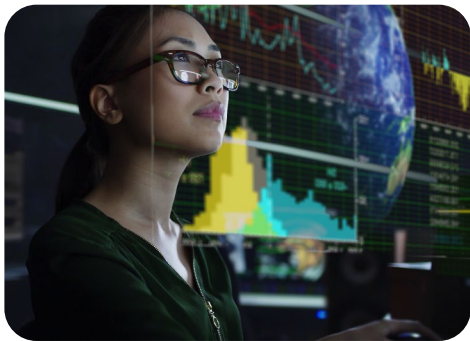

99% malware prevention

Check Point achieved the highest block rate of zero-day threats in independent Miercom testing

50+ years

supporting Australia's largest enterprises with mission-critical infrastructure

The Solution: Harmony SASE by NEC

Unified. Secure. Future-ready. Harmony SASE brings secure Internet access, private access, SaaS protection, and SD-WAN into one intelligent platform. Delivered as a managed service by NEC, it eliminates complexity by replacing multiple point solutions with a single, integrated platform. The result is blazing-fast secure access, Zero Trust controls for every user and device, and seamless visibility across your environment — all backed by NEC's proven expertise and Check Point's industry-leading threat prevention.

Proven Capabilities

1

Zero Trust Private Access

Per-application access with device posture checks and agentless options.

2

10x Faster Secure Internet Access

On-device + cloud inspection reduces latency without sacrificing protection.

3

Advanced SaaS Security

Visibility, misconfiguration detection, and automated threat prevention across 10,000+ apps.

4

Triple-Layer Threat Prevention

Browser, cloud, and device-level defences powered by ThreatCloud AI.

5

Optimised SD-WAN

Secure, resilient connectivity with automated steering for 10,000+ applications.

6

Unified Management

One console for policies, reporting, and end-to-end visibility.

Business Benefits

Boost productivity

Users stay connected with consistent, secure access to apps and data.

Simplify operations

NEC manages provisioning, monitoring, and updates for you.

Lower TCO

Consolidate tools into one subscription-based platform.

Enhance security posture

Block 99.9% of malware and phishing threats with Check Point.

Ensure compliance

NEC's ISO-certified services and Australian SOC deliver trusted governance.

Scale on demand

Expand securely as your workforce and applications evolve.

Why NEC + Check Point?

NEC and Check Point bring together the best of both worlds: NEC's deep engineering expertise, consulting-led approach, and proven track record supporting Australia's largest enterprises and government agencies, combined with Check Point's prevention-first cybersecurity solutions and AI-powered threat intelligence.

This partnership ensures you receive a security posture that is resilient, compliant, and performance-driven - managed locally with the backing of NEC's Australian-based teams and Security Operations Centre, and powered globally by Check Point's industry-leading innovation.

Kickstart your journey with a tailored assessment of your current environment.
