

Cloud Migration Assessment

Modern Workplace

“By 2025, 55% of Australian workloads will be hosted in the cloud” - ADAPT

Overview

NEC's Cloud Migration Assessment helps you understand your current infrastructure estate and provides insights and options to support you in planning your cloud transformation.

Scope

- Deploy and configure discovery tool(s)
- Discover infrastructure and application(s) to be migrated and / or modernised
- SLA and uptime requirements
- Performance requirements
- Data and storage requirements

Duration

3 weeks' estimated duration.

Business Value

- Visibility of current workloads
- Performance and cost recommendations
- Cost saving potential on Microsoft licenses
- Recommendation of target cloud and vendor funding options
- Estimated target state cloud consumption

Deliverables

- Total cost of ownership (TCO) report
- Budgetary cloud cost summary
- Cloud native service adoption recommendations
- High level migration and modernisation approaches

Cost

Complimentary service (minimum 15 server workloads).
