InUC

COST-EFFECTIVE UNIFIED COMMUNICATIONS APPLICATION

NEC InAPP
BUILT-IN SOLUTION

BUILT-IN VIDEO COLLABORATION, DOCUMENT SHARING, PRESENCE, INSTANT MESSAGING AND MORE

In today's working environment, employees are spread across different locations – they need the right tools to communicate effectively and work as a cohesive team.

InUC is a unified communications application providing video conferencing, collaboration, document sharing, presence and instant messaging for any business of up to 128 users. Utilising WebRTC (Real-Time Communications) - InUC provides highly cost-effective video and collaboration that works seamlessly within your IT environment.

Users are able to quickly set-up audio and video connections between two or more PCs or devices from anywhere with an internet and VPN connection or while on the office LAN.

As well as video and audio conferencing functionality, PC users can work collectively with screen share and shared documents. It's also ideal for live software demonstrations and presentation slideshows.

EMPLOYEE AND BUSINESS BENEFITS

Increase your productivity levels: Time-saving features for all your work force

Web video conference: Enables travel savings, mobility, home working and mulit-site organisations

Screen sharing: Provides collaboration on documents with multiple users

Lower costs: Single initial cost, no recurring monthly subscriptions

Easy to use: Minimal / no training required

Always on 24/7: Browser-based

Full call control through web-based client: Enables a quick and easy way to manage calls and lookup contacts

Presence: Provides a 'bird's eye view' of your team's availability simplifying employee communications
