NEC

Turn By Turn Bus Navigation System

With a bus driver shortage affecting operators and authorities globally, there's never been a more important time for tech solutions that aid in improved training and retraining, to support drivers to provide the best possible customer service.

NEC's Turn by Turn is the first bus navigation system built for the unique roads and routes your buses take every day.

After careful consultation with the bus industry, NEC in collaboration with HERE Technologies has developed the Turn By Turn Bus Navigation System, uniquely designed for buses, their routes and diverse workforce.

Currently being rolled out in over 1000 buses Australia wide, Turn By Turn will revolutionise the way your buses get from A...to B.

Common problems being experienced by the Bus Industry:

NEC

Turn by Turn Product Benefits:

Training and Operational modes

Programmed with **your unique bus routes** and lanes

Dynamic changes quick to roll out to entire fleet

Fixed or grab-and-go navigation systems

Navigation on restricted, bus only roads and bus only roads in shopping centres Permit turns at junctions that are restricted to buses

Critical on **time points** and **thresholds**, **restricted roads** and **turns** identified

Provide lane guidance into bus lanes

Minimise wrong turns, re-routes & infringements

Multilingual to empower your diverse workforce
